

Blood Donor Program

We are looking for qualified blood donors

Your pet could help us save lives like Honor! He was the first voluntary blood donor at Pahoa Animal Hospital and has saved many lives so far.

IS YOUR DOG....?

- 2 – 8 Years old
- Up to date on vaccines and wellness care
- Overall healthy with no ongoing medical conditions
- Happy to come to the vet

If so, your pet may be eligible to become a blood donor.

Benefits

- ♥ Help us save lives!
- ♥ Free yearly blood work *
- ♥ 10% off of all services for contract year for donors medical care*

*ask for details

Why do we need donors?

Dogs need blood, just as humans do! Blood transfusions are needed after suffering trauma, auto-immune diseases, heat stroke, hookworm infestation, or other illness.

Blood products are not available on the Big Island to purchase, so we are only able to save these lives with the help from pets like yours.

Talk to our staff today to find out if your dog may be a good candidate to donate blood and schedule a qualification appointment.

If my dog qualifies, what would be involved?

- Bring your pet in for yearly wellness exams
- Give your pet monthly flea/heartworm/parasite preventative
- This is a 1 year commitment
- Plan to schedule 3 blood donation per year
- There is a possibility of 2 off schedule (urgent) donations, with short notice, if able.
- Donations include sedation and shaving some hair from neck area
