BALTO® JUMP

Knee Brace

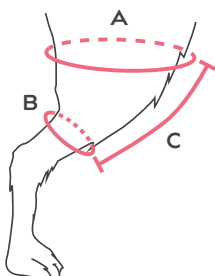

The Balto® Jump is designed to support one of the most common injuries in canines, Cranial Cruciate Ligament (CCL) trauma. Affecting millions of patients annually, CCL injuries include:

- Full or partial tearing of the ligament
- Luxation of the patella
- Knee joint conditions such as arthritis, arthrosis and varus/valgus instability

It can also be used as an alternative to surgery if the patient is not an ideal candidate, pre/post-surgical support, and contralateral support to prevent new injuries.

The brace can also be used without splints for conditions such as arthritis and arthrosis. Compression helps increase blood pressure in the area, raising the temperature of the immediate area and helping to reduce pain.

Peer-reviewed
article available

FEATURES

- Removable aluminum splints
- Straps can be trimmed for a secure and custom fit
- High quality breathable fabric
- Additional compression
- Comfortable to wear
- Hand washable (always remove the rigid splints before washing)
- Available in 6 sizes and as left or right knee

The Balto® Jump has two pockets which contain angled splints that help restrict the lateral movement of the knee when necessary. An abdominal band ensures the brace is secured around the dog. An additional stabilization strap is provided for more active animals.

BALTO® HOCK

Hock Brace

Addressing hock pain, lameness and neuromuscular problems, the Balto® Hock also aides:

- Achilles injuries and orthopedic conditions
- Neurological conditions
- Pre/Post-surgical immobilization
- Contralateral support
- Protection and supporting bandages

The brace can even be used as an alternative to surgery if the patient is not an ideal candidate and can also be used without splints for conditions such as arthritis and arthrosis.

FEATURES

- Removable aluminum splints
- The front splint is slightly adjustable
- High quality breathable fabric
- Additional compression
- Comfortable to wear
- Hand washable (always remove the rigid splints before washing)
- Available in 6 sizes

BALTO® SPLINT

Carpal/Tarsal Laxity Splint

The Balto® Splint is specially designed help to support the radiocarpal, carpometacarpal and tarsometatarsal joints on the front and rear paws. It is ideal for:

- Hyperflexion or hyperextension of the carpal and tarsal (in cases of severe front leg hyperextension or hyperflexion, use Balto® Bone)
- Minor ligament distortions
- Sprains
- Minor fractures of the bone

FEATURES

- Tough, slightly moldable aluminum splint
- High quality breathable fabric
- Comfortable to wear
- Hand washable (always remove the rigid splint before washing)
- Available in 5 sizes, XX-Small and X-Small can be used on cats. The sizes are purely indicative and may not be applicable to some breeds. If used on the rear leg, order one size down.

Measurement B: Height of the brace

BALTO® BONE

Fracture Brace

The Balto® Bone is an alternative to splints and casts for treating hyperextension and bone fractures of the front leg, ensuring support and stabilization during the healing process. The brace is made from a comfortable, breathable fabric making it ideal for day to day use.

It features three rigid splints - one fixed onto the back of the brace, and two that can be freely adjusted with strong Velcro® to provide different positions and levels of stability.

It is recommended to use this brace alongside the Balto® Splint on the unaffected joint to allow the dog to better compensate for the compromised leg.

Ideal for:

- Hyperextension
- Bone fractures
- Front leg trauma
- Arthrodesis

FEATURES

- High quality breathable fabric
- Comfortable to wear
- Hand washable (always remove the rigid splints before washing)
- Available in 6 sizes

Length: Distance from around 2.5 cm below the elbow down to the carpus

BALTO® LIFE

Hip Dysplasia Brace

The Balto® Life is ideal for dogs with all degrees of hip dysplasia. It can help relieve pain by providing bilateral hip compression via two rigid disks lined with a double layer of comfortable, soft material.

The brace is made from a washable, breathable fabric and features adjustable, removable handles to help pets with limited mobility. It can be used as an alternative for pets who are not suitable candidates for surgery, though it is not recommended to use in place of surgery.

Ideal for:

- Hip Dysplasia
- Hip Arthrosis
- Pets with limited mobility

FEATURES

- Bilateral compression of the hips helps reduce pain
- Engineered to allow dogs to relieve themselves naturally without soiling the brace
- Height adjustable handle straps
- Hand washable
- High quality breathable fabric
- Available in 5 sizes

BALTO® JOINT

Carpal Compression Band

The Balto® Joint comfortably stabilizes the affected area, reducing pain and swelling while the animal heals. It can also provide protection for wraps and bandages from licking or biting. By removing the rigid splints, the brace can also be used as a compression brace for acute or chronic arthritis and arthrosis.

Ideal for:

- Carpal lesions
- Lameness
- Arthritis or Arthodesis
- Wrap or bandage protection

FEATURES

- Fully adjustable
- Can be used before or after surgery
- Can be used as a compression brace after splints are removed
- Breathable fabric
- Comfortable to wear
- Hand washable (always remove the rigid splints before washing)
- Available in 5 sizes

BALTO® PULL

Brace for Hyperflexion Phalanges

The Balto® Pull addresses neurological disorders that cause severe proprioceptive deficits, such as:

- Dorsiflexion, or when the dog is unable to sense the position of the limb on the ground and tends to stand on the top of its paw.
- Damage to the sciatic nerve as a result of a fracture of the pelvis or femur, for example, in order to ensure that the neurological problem does not lead to orthopedic damage due to shortening of the flexor tendons of the paw.

FEATURES

- Designed for rear paws
- Additional soft silicone fitting for long term use
- High quality breathable fabric
- Hand washable
- Available in 5 sizes - XXS is ideal for cats and puppies

BALTO® BODY LIFT

Body Harness with Handles

The Balto® Body Lift is a comfortable solution for dogs with difficulty walking due to trauma, disease, or paralysis. The brace can also be used to support and compress the spinal column with the two removable rigid splints contained within the brace's side pockets.

Made from soft, breathable fabric, the it features two length adjustable handle straps and a padded grip, allowing even large dogs to be lifted with ease. It is engineered to allow dogs to relieve themselves naturally without soiling the brace.

Recommended for:

- Lameness
- Arthritis and Osteoarthritis
- Full or partial leg paralysis
- Post-surgery rehabilitation

FEATURES

- High quality breathable fabric
- Height adjustable handle straps
- Removable rigid lateral splints offer greater stability
- Hand washable
- Available in 5 sizes

CODE	SIZE	LENGTH

Length: Distance from the center point of the shoulder to the center point of the thigh

BALTO® LUX

Shoulder Brace

The Balto® Lux is designed to limit the overall abduction of the shoulders. It aids in minor issues, such as inflammation, as well as shoulder diseases that require limiting movement of the joint. It can also be used as a post-operative device to promote gradual rehabilitation.

It is recommended for issues such as:

- Instability of the shoulder joint
- Shoulder Dysplasia
- Joint laxity or hypermobility
- Dislocation
- Inflammation

FEATURES

- Optional Hobble Strap included
- Includes internal stiffeners
- Compresses both shoulders simultaneously
- Adjustable
- High quality breathable fabric
- Hand washable
- Available in 4 sizes

BALTO® UP

Rear Harness Support

The Balto® Up provides mobility support for dogs with arthritis, osteoarthritis, hip dysplasia, and full or partial hind leg paralysis. Two rigid splints provide the firm stability needed for owners to help their dogs continue day to day activities, such as walking or climbing up and down stairs. It is often used by the veterinary profession during rehabilitation and physiotherapy programs.

Made from soft, breathable fabric, it is comfortable to wear and features an easy-to-use, height adjustable handles. It is engineered to allow dogs to relieve themselves naturally without soiling the brace.

Ideal for:

- Arthritis and Osteoarthritis
- Hip Dysplasia
- Full or partial paralysis of the hind legs
- Lameness

FEATURES

- Adjustable
- High quality breathable fabric
- Height adjustable handle straps
- Rigid lateral straps offer greater stability
- Comfortable to wear
- Hand washable
- Available in 5 sizes

BALTO® NECK

Rigid Neck Brace

The Balto® Neck is a compression brace designed to help pets recovering from hernias and vertebral injuries, as well as manage neurological issues associated with the neck. The brace can comfortably be used alongside the dog's personal harness for daily walks.

Due to the unique shape of their necks, it is not recommended for use with sighthounds and bulldogs.

Ideal for:

- Vertebral injuries
- Hernias
- Neurological issues associated with the spine or neck

FEATURES

- Can be used before or after surgery
- Waterproof, breathable fabric
- Comfortable to wear
- Hand washable
- Available in 6 sizes

BALTO® NECK ECO

E-Collar Alternative

The Balto® Neck is a comfortable alternative to the traditional e-collar.

Provides body-only coverage. The Balto® Neck Eco should not be used to protect a pet's paws, ears, or eyes. The brace can comfortably be used alongside the dog's personal harness for daily walks.

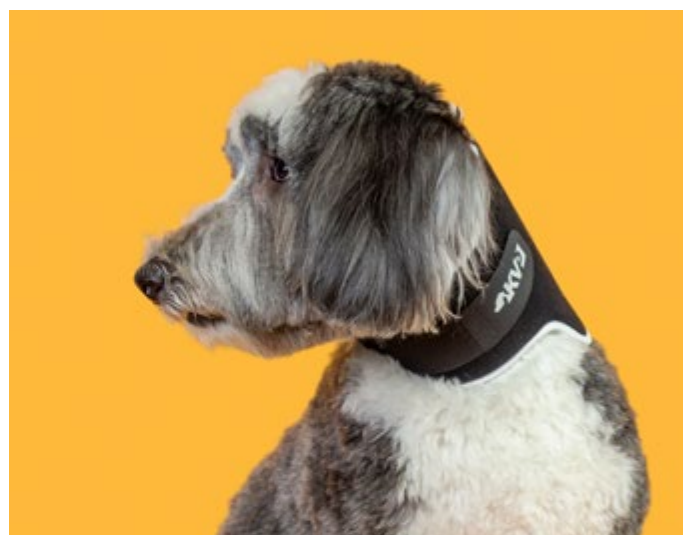

Due to the unique shape of their necks, this product is not recommended for use with sighthounds and bulldogs

It can be used to:

- Prevent pets from disturbing sutures following surgery
- Discourage unwanted obsessive-compulsive behaviors, such as licking or scratching

FEATURES

- Can be used before or after surgery
- Waterproof, breathable fabric
- Comfortable to wear
- Hand washable
- Available in 6 sizes
